

The fully integrated Surface Water Drainage Solution

Installing an effective, fully integrated surface water drainage system is

Easy As 1, 2, 3
Prepare • Install • Finish

EasyDRAIN™ Channel and Grate comes in 1 metre and 3 metre lengths and is made from tough, recycled UV stabilised polymer, making it super light and easy to handle.

The EasyDRAIN™ system allows for a range of configurations using the corners, tee pieces and slim pits that simply click together. Pre-moulded outlets allow for easy integration into your existing stormwater system.

EasyDRAIN™ Channel and components come complete with a choice of grates including pressed stainless steel and pressed galvanised steel, or black polymer that has a wheel load rating of 1.5 tonne, making it suitable for domestic driveways.

Best of all, installation requires just three easy steps – prepare, install, finish.

*Flat upper surface of metal grates may show signs of slight indentation over time if used in a driveway.

*Galvanised grates are not suitable around swimming pools or environments affected by salt water.

SURFACE WATER DRAINAGE

EasyDRAIN™ CHANNEL & GRATE

Note: Dimensions are nominal due to the nature of polymer.

- Made from tough, recycled, UV stabilised polymer, the channel is super-light and easy to handle.
- Channel lengths easily join together and with other components by simply clicking together.
- 200mm paver-length segments which are moulded into the channel allow for easy cutting and rejoining using the converters.
- Connection to storm water pipes can be made to the moulded-in 90mm bottom outlet.
- The channel with polymer grates, once correctly installed in concrete, is

rated to 1.5 tonne wheel loads.

- Polymer grates and galvanised round bar grates are rated Class A.
- Various colours and a range of grates to choose from.
- 100% Australian made.

EasyDRAIN™ Slim Pit

- Allows seamless connection to the stormwater system.
- Moulded outlets for joining to 75mm, 90mm and 100mm PVC pipe.
- Grates available in Black Polymer, Punched Stainless Steel and Galvanised Steel.

EasyDRAIN™ Corner and EasyDRAIN™ Tee Piece

- Allows for an easy change of direction.
- Simple click together joining mechanism with the EasyDRAIN™ channel.
- Various colours and a range of grates to choose from.

EasyDRAIN™ End Cap

- Provides a finishing point where the stormwater pipe is connected to the base of the channel.
- Acts as a connector to 90mm PVC stormwater pipe using the easy cut-out feature.

EasyDRAIN™ Converter

- Acts as a joiner between cut ends of EasyDRAIN™ channel.
- Connects together male ends of channel to a Corner, Tee Piece or End Cap.

Leaf Dome

- Placed at the connection between the channel and stormwater pipe.
- Provides a barrier against leaves and other debris from entering the waterways.

EasyDRAIN™ Channel & Grate Installation Instructions

1 Prepare Trench

- Dig a trench 185mm deep and 250mm 250mm wide.
- Place compacted bedding sand or concrete in the base of the trench.
- Use a string line to ensure straightness and the correct finish height.
- Attach the grates to the channel prior to installation.

2 Install Channel

- Connect End Cap to the ends of EasyDRAIN™ channel and seal with silicone.
- If required, cut the EasyDRAIN™ channel to the desired length.
- Cut an outlet in the base of the channel or End Cap as required to connect to PVC pipe.
- Connect lengths of channel as necessary ensuring that the joints click together.

3 Finish Installation

- Place a suitable expansion material material along the top edge of the channel.
- Pour concrete around each side of the EasyDRAIN™ channel ensuring that the the base of the channel is completely immersed.
- Finish the concrete to approximately 3mm above the level of the grate.
